

How you can help improve the lives of people living with kidney disease

Did you know?

You can support Nottingham Renal Unit and help patients living with kidney disorders by donating to our Renal Unit Fund or Renal Research Fund. Your support will help enhance the care of our patients and enable us to carry out research into improved treatment for kidney disease.

The **Renal Unit Fund** helps us purchase items that make a real difference to patients and visitors.

improved facilities to make patients and visitors feel more comfortable

specialist medical equipment

TVs and DVD players for patients to use during long days on the Dialysis Unit

patients information packs to help explain treatment options

The **Renal Research Fund** enables us to carry out vital research into kidney disease.

innovative developments

improved treatments

prevention of kidney disease

We need your help
